

Dear Chairmen Perry and Schockley and
Members of the Judiciary Committee,

February 11, 2009

SENATE JUDICIARY

15

I am Christina Pfarr Hayden, I live in Butte, ~~born in 1979~~
homeschool educator and mother of 9 children. I ~~DATE OF PREGNANCY~~
~~SB 46~~, because I believe the state of Montana ~~ought to~~
defend it's own interests in the lives of Montanans who reside
in their mother's womb.

What are the state's interests? Montanans. Montanans who will
be born into families, who will eat food grown by farmers and ranchers,
sheltered in homes, built and financed and taxed to pay for their
education by teachers in schools and universities. Montanans who
will work and pay income taxes to support the government's roll to
serve him and his family by serving the common good.

The true common good does not exclude the defense of the unborn
Montanan's right to live, in the name of a private decision of his
mother and an abortionist. Defending "privacy" to keep abortion legal
isolates a woman and disconnects her from those in her family and
community who would provide the security, support, and protection she
needs when she is pregnant. Defending this "privacy" abandons a woman
during an extremely vulnerable time, when she most likely to be
manipulated, coerced, and even forced to make a decision that is
not her own, to abort her own child. This "right to privacy" does not
help women to defend themselves against abortion, but makes them
more vulnerable to abort.

28 years ago I was forced to abort my baby, because my
"right to privacy" made abortion legal in Montana. My "right to
privacy" prevented others from offering the help I begged. My
legal "right to privacy" kept me isolated in guilt and shame and
fear these 28 years, I will be silent no more!

Montana's pregnant women don't need a "right to privacy"
when abortion is legal. Is this "right to privacy" to protect abortion
more important than Montana's pregnant women and the
Montanan's in their womb? Pregnant women deserve better
than abortion. Montana's pregnant women need protection
from the "right to privacy" so Montanans can be born.

Please vote YES on SB 46.

Christina Pfarr Hayden
